To Our Patients:

We are delighted to inform you that we have relocated our clinical and research program to St. Luke's-Roosevelt Hospital Center, located at 1000 Tenth Avenue (59<sup>th</sup> Street), in Manhattan.

The Division of Hematology/Oncology at St. Luke's Roosevelt Hospital Center is part of the Continuum Cancer Centers of New York (CCCNY), one of the largest cancer programs in the Northeast. Continuum Cancer Centers see more than 6,000 new patients per year, follow 25,000 survivors annually, and participate in more than 50 clinical trials. Across six sites, in Manhattan and Brooklyn, there are 250,000 patient visits per year. CCCNY is accredited by the American College of Surgeons Commission on Cancer (ACOS) and was the first hospital system in New York State to earn Network Accreditation.

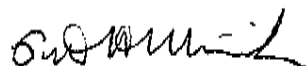

This move presents an outstanding opportunity for us to continue to provide you care as we work to develop novel therapies and expand our research programs in a state-of-the-art center. We look forward to continuing your care at this location. You may reach our offices at 212-636-3334 (Dr. Dutcher) and 212-636-3338 (Dr. Wiernik) to schedule an appointment.

We look forward to seeing and working with you again.

Sincerely,

Janice P. Dutcher, M.D.  
Director, Immunotherapy CCCNY  
Attending Physician  
Division of Hematology/Oncology

Peter H. Wiernik, M.D.  
Director, Leukemia Program CCCNY  
Attending Physician  
Division of Hematology/Oncology
